

Origami

I made a ball with *origami* when school was closed. I needed many *origami*, colorful papers to make this. First, one paper was divided into four equal parts. I had to prepare 38 of them. It was easy to fold one by one. But it was very difficult to assemble many parts. I was satisfied with the finished product. Now I hang this ball in the front door of my house. I want to fold an *origami* more.
